

WOMAN ON TRAIL OF BRICK TRUST

Secures Indictment of Four Individual Members.

CANTON MAN IS IN THE LIST

Federal Grand Jury at Chicago Stops Chase After Beef Packers Long Enough to Try Concerns. Accused of Forming Combine Contrary to Provisions of Sherman Anti-Trust Law—Alleged Combine Maintained Headquarters in Windy City.

Chicago, Sept. 15.—On charges of conspiracy in restraint of trade, a violation of section 1 of the Sherman anti-trust law, the federal grand jury indicted the chief individual members and firms of the so-called brick trust. Four individuals and three corporations were named in the indictments and bench warrants were issued by Judge Landis. The following is a list of the alleged conspirators named as defendants: D. V. Purington, president of the Purington Paving Brick company of Galesburg, Ill.; C. C. Barr, president of the Barr Clay company of Reading, Ill.; H. S. Renkert, secretary of the Metropolitan Paving Brick company of Canton, O.; William F. Brennan, sales agent in Chicago for the three concerns. The indictment was voted largely on the testimony of Mrs. Aileen Christopher, who had figured in previous court actions against the combine and some of its members. Failing in civil actions, she told her story before the grand jury and the actions followed. After returning the true bills the grand jury adjourned to Monday when the oleomargarine case and the wind-up of the beef trust cases will be taken up.

NEW YORK CONTEST TAKEN UP STATE

Roosevelt and Sherman Factions Both Confident.

New York, Sept. 15.—Now that the local primaries have been held, the warring factions in the Republican party are in training for the important primaries which are to be held in most of the cities up-state next Tuesday. The fight is for delegates to sustain the selection of the state committee of Vice President Sherman to be temporary chairman of the state convention, or for delegates to unseat the vice president of the United States as such temporary chairman by a vote of the convention and to replace him by ex-President Roosevelt. According to the Barnes-Woodruff folks the results of the primaries show a Roosevelt majority of 86, while according to the Griscom people the former president has 76 votes to the good. There are the usual differences of opinion natural to a situation like this over the final result of the primaries to be held in the up-state cities and in the country districts. William Barnes, Jr., said he had no figures to give out, but he reiterated that there would be a large majority of the delegates who would sustain the Republican state committee in its selection of Sherman to the temporary chairmanship. President Griscom of the New York state committee on the other hand was equally positive that the Roosevelt-Griscom people would have votes enough in the state convention to unseat Sherman and elect Roosevelt and thus capture the machinery of the convention and incidentally the committee on resolutions. The Roosevelt-Griscom people favor Henry L. Stimson, former United States district attorney, for governor.

Fall Always Brings the New Things

The first information on Fall Styles---as shown by leading designers --- now on display in our windows and Suit Department.

Shoulders are to be small and narrow, skirts scant and clinging---everything tending to produce girlish lines.

We have never had simpler styles nor styles of more refinement and charm.

Collars are important. No two alike. Many are formed from two cloths in various shapes and are the dominant note both in coats and suits.

Each skirt has same individual cut to its panels---The same scheme often being carried out in the short, narrow jacket. The severely tailored suit will be much in evidence.

The vogue for large top coats, that practically envelop one, is increasing and is fast becoming one of the features in out door apparel. They are used constantly for motoring, driving, traveling, and are being adopted for ordinary street usage.

Materials are of many rough weaves, in somber tones but trimmed in smooth cloths and rich embroideries.

Broadcloths will be good. The smartest materials are rough tweeds, homespun and chevots. Dark blue serge is always good.

SPURZHEIM AND THE STUDENTS.

Spurzheim, the father of modern phrenology, while staying in Edinburgh, where he had a great vogue, was the victim of a laughable hoax. A number of medical students submitted for the opinion of the phrenologist the plaster cast of what they said was a remarkably formed human skull. As a matter of fact it was the model of a big Swedish turnip (called in the Scottish tongue "neip"), and of this Spurzheim gravely wrote out the phrenological character. A few days later the following skit appeared in the leading journal of the city: The tide of fame to Spurzheim's name Rolled o'er the German deep; The tide was spring; but, fickle thing, It now has ebbed to "neip."

Why the Editor Skipped.

An editor of a small American paper recently stated that he had been kissed by one of the most beautiful married women in the town. He promised to tell her name in the first issue of his paper next month. In two weeks the circulation of his newspaper doubled. But when he gave the name of his wife he had to leave town.—Fourth Estate.
